RideOps

The operations platform for
campus accessible-ride
programs

PREPARED FOR

University of Scranton · August 14, 2026

Key Challenges

Running a campus ride program presents numerous challenges. Dispatchers face overwhelming call volumes, while outdated systems lead to inefficiencies, ride tracking issues, and frustrated riders waiting for updates.

What RideOps Is

RideOps is a **comprehensive platform** that streamlines the entire ride lifecycle, from booking to dispatch and reporting, ensuring seamless operations and enhanced user experience on campus.

How Riders Book

Riders can effortlessly book their rides in just **three simple steps**: choosing their location, selecting a time, and confirming their request, all from a real-time campus building list.

Campus locations only.

Live Operations Control

Dispatchers gain a **real-time overview** of all ride requests, enabling swift approvals and efficient management of resources, ensuring timely transportation for all campus riders.

Request Status Filter			
Approved	Scheduled	In Progress	Completed
No-Show	Cancelled	Denied	
Request ID			
RIDER ID	ROUTE ID	STATUS	STATION
1	Casey Rivera	Main Library → Residence Hall C	ap
2	Casey Rivera	South → Campus Bookstore	pe
3	Casey Rivera	Humanities Building → Parking Structure A	sc
4	Riley Chen	Residence Hall B → Maintenance Facility	ap
5	Riley Chen	Campus Security → Parking Structure A	sc
6	Riley Chen	North → Campus Quad	co
7	Riley Chen	Campus Quad → Business School	pe
8	Casey Rivera	South → Stadium	co
9	Casey Rivera	Administration Build... → Residence Hall B	sc
10	Riley Chen	Law School → South	co
11	Riley Chen	Campus Bookstore → Parking Structure A	sc
12	Casey Rivera	Student Union → Administration Build...	de
13	Casey Rivera	Business School → Administration Build...	sc
14	Casey Rivera	Fine Arts Building → Parking Structure A	co
15	Casey Rivera	Administration Build... → Aquatic Center	

How Drivers Operate

RideOps empowers drivers through a **mobile-first approach**, enabling them to manage rides seamlessly, update statuses with a tap, and access schedules all from their smartphones.

You're Clocked Out

 **CLOCK IN**

Clock in to see available rides

See It in Action

Your Brand

- Each campus gets its own colors, program name, and building list
- Org-scoped URLs: `app.ride-ops.com/your-campus`
- Campus-aware charts, dispatch boards, and reports
- Configurable rules: service hours, grace period, strike policy, academic terms
- Setup measured in days, not semesters

The fit

Your requirements, honestly mapped

Your five asks, honestly: Real-time ride requests — covered: students book from real Scranton buildings, same-day included. Dispatcher dashboard — covered: live queue, one-click approvals, per-driver board. Ride status updates — covered: every step, pushed to the rider. ETAs — partial: booked-ahead by design; "on the way" and "arrived" statuses with a grace countdown cover the moment that matters. Live messaging — partial: notifications today, true chat on the roadmap. Mobile — mobile web app, add to home screen, no App Store required.

Where It Fits

Understanding RideOps' design and future development roadmap

RideOps is designed for scheduled rides, prioritizing reliability over anonymous requests. Our current mobile web app eliminates app store downloads, ensuring ease of access for all users.

Campus locations only.

Pricing Overview

FREE PILOT PROGRAM

Experience RideOps with a **3-month free pilot** that includes full access to all features and dedicated support, allowing you to assess the platform without commitment.

ANNUAL SUBSCRIPTION

After the pilot, enjoy a **flat annual subscription** tailored to your campus, covering unlimited riders, drivers, and vehicles without hidden fees or per-ride costs.

Pilot Rollout Plan

WEEK 1

Your branding and program rules will be configured and live on the platform.

WEEKS 2–4

Dispatchers and drivers onboarded, and riders invited to start using RideOps.

MONTHS 2–3

Full service on RideOps with weekly check-ins to ensure smooth operations.

END OF PILOT

Review data together and decide on the next steps for your campus.

Built by an Operator

FROM THE DISPATCH SEAT

Why RideOps exists

RideOps was built by someone who supervised a campus accessible transportation program — dispatching golf carts by radio and tracking rides on paper. It's the tool that office needed. Next step: a 3-month pilot on your campus, free, with your branding and your buildings.

Let's pilot it
